

Changing The Game

9th May 2015

Join an interactive energy planning game where you can create a 2035 energy scenario!

Outcomes?

- challenge yourself with juggling numerous parameters needed for energy planning

- meet students of similar study lines with whom you might be working with in the future

- talk to a company representative about it

VATTENFALL

- go on a tour of Esbjerg harbor - the heart of Energy Metropolis of Denmark

Timeframe

1 day workshop
9 am – 7 pm

Where?

6700 Esbjerg
Niels Bohr Vej 9
University of Southern Denmark,
campus

Not from Esbjerg?

Ask if your university is part of the program that sponsor student's transportation costs to come participate in the workshop.
